

THE CØDEST
IN CODE WE TRUST

We are a custom **software development company** that delivers **top-notch engineers** for fintech, e-commerce, SaaS, and adtech projects.

Our software development experts excel at Java, PHP, Ruby, Python, React, and Vue technologies.

Our unique points:

KNOW-HOW + TALENTED ENGINEERS

Tech stack

15+ Countries covered

20+ Tech products built

50+ Happy clients

40+ Software engineers on board

Discover our expertise and proved The Codest skills

In a very short time, our team has built the first-ever tech product for Yieldbird. We have pushed them to Deloitte's list of 'Technology Fast 50 Central Europe'.

In the meantime, we started a Code Sensei project - our programming school in which we have educated the best IT talents from the market and share our knowledge with them.

Today, after being 12 years on the market, we are considered as a TOP Software Development Company in CEE.

Team extension

With constantly rising demand for software engineering professionals and fierce competition between tech companies, **extending your teams with partner software vendor helps you to keep your development stable.** We strongly believe in an easy plug&play model. How to do it right?

We believe that at current market condition, speed is a key factor for success with attracting top engineering talents. **Our promise is to deliver perfectly matched developers within 2 weeks** from a discovery call. Feel invited to contact us and ask any questions on your mind.

Team extension – how does it work?

1

1st contact

Every successful partnership needs to start somewhere. You can reach out to us by multiple channels, we strive to respond within 2 hours during business days. Fast.

2

Discovery call

Let us get to know each other to understand your current engineering challenges. Curious.

3

Gathering requirements

The more information you share with us, the easier it is for our team to address your request with relevant proposal. Accurate.

6

Shortlisting engineers

Success! Your ideal team is on the way to join your project. Fit.

5

Technical fit check

Handing over to your team to choose relevant engineers and screen them on individual tech calls. Verified.

4

Feedback session

Our team discusses your requirements internally to build a tailor-made list of our available engineers. Collective.

7

Kick-off date

Confirm starting dates and detailed onboarding plan for your new team members. Ready.

8

Contract signing

Formal agreement to secure the terms for a successful cooperation. Set.

9

Ramp-up planning

Our Account Manager sets expectations and checkpoints with your team to plan further demand we could help you with. Go.

Why is it worth working with us?

Talent pool access

Rapid contact and contract

Code and people quality

Client success and satisfaction

People development and care

Quick growth

Our success story

ABOUT THE CLIENT

The leading digital health and wellness company in the Nordics offering videos, playlists, and programs online within yoga, meditation, relaxation, mobility practice, stress management, and personal growth in collaboration with market-leading experts.

INDUSTRY

Healthcare

HEADQUARTER

Stockholm, Sweden

SCOPE

BACKEND

The Codest software development team helped us on multiple projects. On the one side, they helped shape up and build a whole new service that makes our product process verifications faster. Additionally, they helped us with staffing our internal API team to maintain and support our clients.

Julie Lacoppidan

Partner & Director, Min-Mave

I must admit that The Codest has been providing us with a qualified engineers team who did their job without any complaints. They have worked on launching a new platform on top of an existing e-commerce platform.

Giedrius Rimkus

Engineering Manager, Kesko Senukai Digital

They are honest, straightforward, and solution-oriented. The collaboration was fruitful as The Codest development team was able to produce a more optimized platform that increased sales and retention rates.

Peter Muntenau

CEO, Yogobe

The Codest produced high-quality deliverables and their React and Vue developers implemented an excellent work ethic. They're effective communicator and transparent in their estimations. Professionalism and company culture are hallmarks of their work.

Jakub Krzych

CEO, Estimote Inc.
